Estimating Sums and Differences to the Nearest Thousands

Estimate the sum or difference by rounding each number to the nearest thousands.

1) 8,625 - 1,756 = 7,000

2) 9,893 - 3,384 = _____

3) 3,681 + 4,711 = _____

4) 5,456 + 6,385 = _____

5) 5,488 + 2,342 = _____

6) 6,863 - 1,291 = _____

7) 6,831 + 3,538 = _____

8) 3,258 - 1,181 = _____

9) 4,924 + 7,889 = _____

10) 8,427 + 7,256 = _____

11) 7,246 - 5,324 = _____

12) 9,439 + 9,448 = _____

13) 8,112 - 2,658 = _____

14) 4,317 - 2,186 = _____

Estimating Sums and Differences to the Nearest Thousands

Estimate the sum or difference by rounding each number to the nearest thousands.

1) 8,625 - 1,756 = 7,000

2) 9,893 - 3,384 = 7,000

3) 3,681 + 4,711 = 9,000

4) 5,456 + 6,385 = 11,000

5) 5,488 + 2,342 = 7,000

6) 6,863 - 1,291 = 6,000

7) 6,831 + 3,538 = 11,000

8) 3,258 - 1,181 = 2,000

9) 4,924 + 7,889 = 13,000

10) 8,427 + 7,256 = 15,000

11) 7,246 - 5,324 = 2,000

12) 9,439 + 9,448 = 18,000

13) 8,112 - 2,658 = 5,000

14) 4,317 - 2,186 = 2,000
